Key Strategic Insights & Portfolio Analysis

- 1. Contract Vulnerability:** 100% of revenue churn occurs in Month-to-Month contracts. Annual and Two-Year contracts exhibit 0% churn, securing ■859.92 in predictable MRR.
- 2. High-Risk Payment Channels:** Customers using UPI and Debit Cards experience disproportionately high churn (100% of UPI users churned), whereas Bank Transfer customers demonstrate 100% retention.
- 3. Early-Tenure Drop-off:** Churn occurs primarily within the first 14 months (mean = 7.0 months). Interventions focused on onboarding during months 1–6 will directly improve retention rates.
